REPORTING FOR WEEK ENDING November 13, 2005 CROP YEAR

RELEASED: November 14, 3PM - There were 7 days suitable for field work. Soil moisture supplies were 29% very short, 42% short, 28% adequate, and 1% surplus.

CROPS: Dry conditions have allowed fall harvest and winter wheat planting activities to be completed well ahead of normal. Producers have also had the opportunity to get a jump start on preparing the ground for spring planting. However, the lack of rainfall has slowed winter wheat germination, emergence, and overall crop development.

LIVESTOCK: Livestock were reported to be in fair condition. Cattlemen continued to worm and vaccinate their herds. Most hay had been cut and was being fed to cattle along with supplements. Winter pastures were being fertilized while cool season forages struggled due to lack of rainfall.

Progress %					Condition %				
CROP Stage	Current Week	Previous Week	Previous Year	5 Year Average	Very Poor	Poor	Fair	Good	Excellent
SOYBEANS									
Matured	100	99	99	98					
Harvested	97	95	81	85					
COTTON									
Harvested	99	99	80	88					
WINTER WHEAT					6	15	46	32	1
Planted	90	86	52	74					
Emerged	67	55	37	58
